

PEARSON 422

DREAMS COME TRUE.

■ More than by her luxury and enormous privacy, you'll be impressed by the emphasis Pearson has placed on the "little things" that make big differences.

■ For example, the Pearson 422 owner's cabin aft has a bed you can get in and out of from both sides. In the galley there's a deep double sink, and an ice box that's easy to reach into. Forward and aft staterooms have their own head and shower. And throughout, there's

enough stowage to accommodate even your most ambitious cruising plans.

■ The cockpit gives you superior visibility in all directions and for 1987 we've raised the backrests for even more comfort.

Specifications: L.O.A.: 41'8"; D.W.L.: 35'8";
BEAM: 12'10"; DISPLACEMENT: 22,000 lbs.;
BALLAST: 7,600 lbs.; DRAFT: 5'3"; SAIL AREA:
719 sq. ft.; POWER: Diesel.

Some of the reasons why a new Pearson Yacht will maximize your pleasures afloat.

For over 30 years Pearson Yachts has been notably successful at balancing the changing demands of sailors with the unchanging demands of wind and sea.

Innovations in design combined with modern construction materials and techniques mean that today's Pearsons are better engineered than ever. This translates into more comfort and more performance. It also means they're easier to handle under power or sail, easier to maintain, and will return excellent values in enjoyment and resale.

Interiors are richly finished and furnished. The Pearson standard equipment list is so complete that the only factory option for you to consider is keel type.

Unchanged in today's Pearsons is our basic design philosophy, born from years of seagoing experience, that says safety is our number one priority.

Your Pearson dealer has lots more information on the Pearson model that interests you most. Stop by his place of business—he may have one in stock.
