

**Brewer 12.8-Meter
Cruising Cutter**

Your next port-of-call can be in the land of your dreams. And the magical craft to take you there is Ted Brewer's New 12.8 Meter Cruising Cutter, designed for those who never accept any less than the very best.

Chasing the sun or anchored at harbor, the 12.8's profile is dashing and distinctive and will be pleasantly familiar to Ted Brewer fans. Below the waterline, however, the 12.8 sports a state-of-the-art keel/centerboarder with separate skeg-hung rudder and a draft of only 4'6". These, combined with other Brewer innovations, virtually assure that the 12.8 will exhibit outstanding upwind maneuverability.

This performance, plus the yacht's classic styling, together are a symphony of rare beauty. In fact, Ted Brewer planned his functional and design

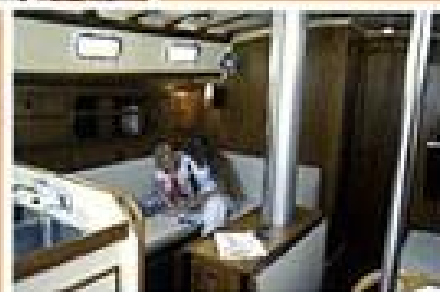

features to work as one so that all aboard her will enjoy the ultimate romantic experience of pure sailing pleasure.

The interior of the Brewer 12.8 is, in a word, sensational. The creature comforts and the functional appointments are both top-quality and plentiful.

Just consider these amenities:

- U-shaped galley with two large sinks, 3-burner LPG stove with oven, refrigerator and freezer.
- Bar with charming extras
- Main salon with navigator's station and dinette
- Sleeping quarters and lots of elbow room in each of the two staterooms.

The large engine room houses the diesel power plant and allows plenty of room for maintenance, with additional space for optional generator and air-conditioning.

The Brewer 12.8 derives its momentum from the wind and its secondary power from a 61 hp diesel engine.

You and your crew will enjoy long and lazy afternoons aboard the yacht with its ability to cruise some 700 miles at seven knots on 125 gallons of fuel. Fresh water is stored in two aluminum tanks, comprising a total of 200 gallons.

At the seat of power, in the cockpit, generous space has been allowed for your guest and complete walk-around room surrounding the helm.

Construction is of fiberglass with a balsa core in the hull and deck. The yacht is finished throughout with carefully handcrafted teak joiner work, European-style rounded doors and a teak and holly sole. The signature of Ted Brewer's innovation and Ft. Myers Yacht & Shipbuilding, Inc.'s creativity is evident everywhere.
