Marana, 48 foot, designed in 1976. The Marana is ideally suited to those who desire maximum comfort and safety for ocean cruising. We are now manufacturing hull number 200.

Marana has proven herself in the Mediterranean, where seas, the Maranas are easily handled by two crew members, regardless of wind and sea conditions. We at Amel have lost count of the problem-free Atlantic crossings and circumnavigations these yachts have made successfully.

September 1985

The Marana joins the new generation of Amel boats, which includes the Mango and Shark both designed for ocean cruising.
A "happy and enthusiastic. For me, this is really the ideal cruising boat." and enthusiasm. For me, this is really the ideal cruising boat."

I formerly owned one of the original charters and now have the new model shown in this brochure. Each time I go on board am and have the new model shown in this brochure. Each time I go on board am

and many other additional features.

- Unique hull design.
